MESSAGES

Current:

To improve your aerobic capacity, you will need to be active most every day. Participate in moderate or vigorous aerobic activities 30 to 60 minutes at least 5 days each week.

Improve your flexibility by continuing to do your stretching activities. Be sure that you are stretching slowly 3 or 4 days each week, holding the stretch 20-30 seconds.

Your trunk and upper-body strength are both in the Healthy Fitness Zone. To maintain your fitness, you should begin doing strength-training activities that include resistance exercises for each of these areas. Trunk exercises should be done 3 to 5 days each week. Strength activities for other parts of your body should be done 2 to 3 days each week.

Your abdominal strength was very good. To maintain your strength, begin doing curl-ups and other resistance exercises 3 to 5 days a week. Remember to keep your knees bent. Avoid having someone hold your feet.

Jenice, your body composition is in the Healthy Fitness Zone. Doing physical activity most days may help to maintain your level of body composition. You should also eat a healthy diet including more fruits and vegetables and fewer fats and sugars.

Healthy Fitness Zone for 21 year-old girls
One Mile Run = 8:00 - 10:00 minutes
Curl-Up = 18 - 35 repetitions
Trunk Lift = 9 - 12 inches
Push-Up = 7 - 15 repetitions
Back-Saver Sit and Reach =
At least 12 inches on R & L
Body Mass Index = 17.20 - 27.30

To be healthy and fit it is important to do some physical activity almost every day. Aerobic exercise is good for your heart and body composition. Strength and flexibility exercises are good for your muscles and joints.

Good job! You are doing some aerobic activity and flexibility exercises. Add some strength exercises to improve your overall fitness.
